**Genuine Oil Filters**

**ORIGINAL EQUIPMENT YOU CAN TRUST IS THE BEST BARGAIN OF ALL**

It’s easy to save a few pennies of “will-fit” filters but what is the true cost of using the wrong parts?

---

**AN INTEGRATED SYSTEM**

Volvo Genuine Filters are part of an integrated system of components that work together. Peak performance requires each part to perform together seamlessly.

Every Volvo replacement filter is engineered to meet Volvo’s original, uncompromising standards of quality and precise manufacturing specifications.

---

**The benefits of Volvo Genuine Oil Filters:**

- Designed and tested to meet Volvo rigid engineering requirements
- Pressure-resistant housings and components
- Long-life filter media made of blended micro fibers
- Long-life seal materials
- Highly efficient media used to protect Volvo engine components

---

**SUPERIOR FILTRATION**

Volvo uses only the finest available filter media, adhesives and seals. These materials are chosen to produce the finest filters for your Volvo truck.

A “will-fit” filter, which may cost 25% less, may only offer 40% of the performance. Why risk excessive wear and unnecessary downtime that can cost you more in the long run?

---

**PEOPLE WHO CHOOSE VOLVO TRUCKS KNOW QUALITY**

If you choose to buy Volvo trucks then it’s time to choose Genuine Volvo Filters

**Description:**

- Robust and corrosion protected filter housing
- Stable base plate for mechanical stability
- Strong seam guarantees tightness under all conditions
- Long life high quality rubber gasket
Genuine Fuel Filters
ORIGINAL EQUIPMENT YOU CAN TRUST IS THE BEST BARGAIN OF ALL

It’s easy to save a few pennies of “will-fit” filters but what is the true cost of using the wrong parts?

The rapid development of diesel technology has made the filtration of diesel fuel before it reaches the injection system a top priority. Badly filter diesel causes particle erosion, corrosion and can lead to damage in the injection system.

• Robust and corrosion protected filter housing
• Stable base plate for mechanical stability
• Strong seam guarantees tightness under all conditions
• Long life high quality rubber gasket

SUPERIOR FILTRATION
Volvo uses only the finest available filter media, adhesives and seals. These materials are chosen to produce the finest filters for your Volvo truck.

A “will-fit” filter, which may cost 25% less, may only offer 40% of the performance. Why risk excessive wear and unnecessary downtime that can cost you more in the long run?

AN INTEGRATED SYSTEM
Volvo Genuine Filters are part of an integrated system of components that work together. Peak performance requires each part to perform together seamlessly.

Every Volvo replacement filter is engineered to meet Volvo’s original, uncompromising standards of quality and precise manufacturing specifications.

• Long life filter media made with blended micro fibers
• Even pleat distribution to ensure maximum contaminant holding capacity
• Non-plastisol glue joints of filter media to end cap
• Achievement of cleanliness standards
Genuine Air Filters
Quality Filters Start With Quality Materials

Will-fit air filters that leak or contain defective filter paper can lead to harmful engine wear.

The Volvo Genuine Air Filters are specially designed with high-quality materials to ensure a proper fit, good capacity and excellent efficiency throughout the maintenance interval.

VOLVO GENUINE AIR FILTERS THE QUALITY IS CLEAR

Filter paper – Volvo Genuine Air Filters are built with special filter paper that provides a high degree of filtration – 99.9 percent. Fewer filter changes and lower running costs.

Resin – Our resin provides a strong, flexible end-cap seal for Volvo Genuine Air Filters to help ensure that every particle filtered away from your engine stays away from your engine.

The alternative – Only Volvo Genuine Air Filters are designed and built especially for Volvo trucks. Will-fit filters may save you a few dollars, but they don’t provide the same high level of filtration, and can cause damage to your engine.

Your fuel mileage – Down. That’s where your fuel mileage goes when the air intake becomes contaminated because of inadequate air filtration. Be sure to replace your air filter with nothing less than Volvo Genuine Air Filters.

The benefits of Volvo Genuine Air Filters:
- Better grip protection, which helps during installation and removal of the element
- Better mechanical stability of the element
- Improved pleat stability, which means higher service life of the element in the field
- Precise pleat distances maintained across the entire filter even in damp environments provides durability
Genuine Cabin Air Filters
Quality Filters Start With Quality Materials

Volvo Cabin Filters reliably adsorb even tiny particles which can only be seen using a scanning electron microscope.

Both driver and passengers are protected against pollen, dust and premature wear to the air-conditioning system is avoided.

The benefits of Volvo Genuine Cabin Air Filters:
• Optimum ventilation inside the vehicle through low flow resistance
• Even the smallest particles are reliably filtered out
• Consistent filtration performance throughout the entire service interval
• Greatest filtration efficiency through a combination of mechanical and electrostatic attraction
• Exact fit and seal

Volvo genuine cabin air filters the quality is clear

Product Features
• A special pleating technique provides maximum possible filtration efficiency in the smallest space
• Outstanding filtration performance for dust, soot, pollen and other particles
• Precisely coordinated filter dimensions ensure easy, perfect fit
• Pleasant environment in the passenger compartment
• Cabin filters protect the expensive air conditioning system
• Clean air helps to maintain the performance of the air conditioning system and heater
• The filter maintains the functional reliability of the air conditioning system, where a defect would cost a lot more to rectify than changing the cabin filter.
• Filtered air in the passenger compartment helps to keep the vehicle interior fresh for longer

Enhanced Quality
• Optimum ventilation in the passenger compartment through filters designed specifically for the vehicle and/or the air conditioning system, ensuring optimum filtration efficiency
• Noticeable improvement in comfort and wellbeing in the passenger compartment
• Helps reduce formation of a greasy film on the windscreen inside the vehicle which can cause dangerous dazzling effects from oncoming headlights

Preventing Health Hazards
• Protects the respiratory tract
• Reduces the risk of headaches, fatigue and poor concentration caused by harmful substances generated from road traffic contaminants
• Filter retains pollen to prevent allergic reactions
• No unfiltered air enters the passenger compartment
